

EAZHLMAHAN E R

Chennai, Tamil Nadu, India | +91-9384689121 | eazhl2018@gmail.com
 LinkedIn: Eazhlmahan E R | GitHub: Eazhlmahan

PROFESSIONAL SUMMARY

Motivated Computer Science graduate with hands-on experience in full stack development, AI-based systems, and IoT projects. Skilled in Java, JavaScript, Angular, and Python with a strong foundation in REST APIs and backend architecture. Cleared TCS iON NQT with 80 Percentile. Strong academic record (CGPA: 8.6). Seeking a software development role to contribute to impactful and innovative projects.

ACHIEVEMENTS

- Cleared TCS iON National Qualifier Test (NQT) with **80 Percentile** – demonstrating strong aptitude in programming, numerical reasoning, and verbal ability
- Graduated with **CGPA 8.6** in B.E. Computer Science and Engineering from Agni College of Technology

EDUCATION

Agni College of Technology, Chennai B.E. Computer Science and Engineering CGPA: 8.6	Nov 2022 – 2026
Gill Adarsh Matriculation Higher Secondary School, Chennai HSC 81%	2021 – 2022
Gill Adarsh Matriculation Higher Secondary School, Chennai SSLC 82%	2019 – 2020

WORK EXPERIENCE

Java Full Stack Developer Intern – Vortex • Developed full stack modules using Java, REST APIs, and web technologies (HTML/CSS/JavaScript) • Implemented backend logic and front-end integration for functional mini-applications • Gained practical knowledge of MVC architecture and API design patterns	2024
Data Analytics Intern – NSIC • Utilized AI-based tools to analyze datasets and extract actionable insights • Strengthened analytical and problem-solving skills through real-world data scenarios • Collaborated on reporting dashboards and data visualization tasks	2023

PROJECTS

AI-Based Intrusion Detection System & Mitigation Strategies • Built a machine learning model to detect network intrusions and classify attack types (DoS, DDoS, port scanning) • Implemented automated mitigation strategies triggered upon threat detection, reducing response time • Used Python, Scikit-learn, and network traffic datasets (NSL-KDD) for model training and evaluation • Achieved high accuracy in anomaly detection using Random Forest and SVM classifiers	
Smart Soil Moisture Monitoring System (IoT) • Developed an IoT system using ESP32 and sensors to monitor real-time soil moisture levels • Integrated cloud-based data updates to improve monitoring accuracy and optimize power consumption • Enabled remote access to live sensor data via a web dashboard	
Interactive Python Games (Snake, Connect 4, Tic-Tac-Toe) • Built logic-driven games using Python and Pygame with modular code and event handling • Implemented UI components and gameplay mechanics with clean, reusable code structure	
Analog Clock Application (Python + Tkinter) • Created a real-time analog clock using Tkinter with smooth rendering and event loop management	

SKILLS

Programming: Java, Python, JavaScript, C	IoT: ESP32, Sensor Integration, Cloud
Frontend: Angular, HTML, CSS	Tools: Git, GitHub, Pygame, Tkinter
Backend & APIs: Java Full Stack, REST APIs	Soft Skills: Leadership, Team Coordination, Problem Solving
AI / ML: ML, Intrusion Detection, Scikit-learn	Languages: Tamil, English, Hindi

CERTIFICATIONS & ADDITIONAL INFORMATION

- Full Stack Development – Coursework & Projects
- Introduction to Data Science – SkillUp
- Python Fundamentals for Beginners
- Front-End Development (HTML/CSS) – Great Learning
- Prompt Engineering – ChatGPT
- Active GitHub contributor with personal & academic projects
- Completed multiple Python & Web development projects independently
- Recognized for strong problem-solving during internships
